Night Vision: An Enhanced Color Experience For the Floor

Bentley brings innovation in yarn technology to light, changing how we look at commercial carpet – and interiors

LOS ANGELES (June 2017) — Perception is everything. With Night Vision from Bentley, you’ll see carpet in an entirely new light. Leveraging innovation in yarn technology, the new broadloom and carpet tile product features unique dimension and depth of color that shifts the design depending on the direction you’re walking. Like the cut of a gem, Night Vision explodes into a kaleidoscope of reflective color on the floor. It’s an experience that promises to change your perspective.

Perfect for designers seeking brilliant yet surprising style, the crystal-esque design reflects light as if it’s bursting through a prism, illuminating the floor in soft striations of monochromatic color. Variegated yarns alternate between low and high luster, mixing color in unexpected ways to create a subtle ombré effect – available in a range of gradient combinations.
With the proprietary color-changing technology of Bentley’s COLORCAST™ program, designers have access to infinite possibilities of color combinations (with no additional minimum order requirements). Matching color from any source, including paint chips and fabric swatches, COLORCAST empowers designers to embrace endless possibilities. From subtle neutrals to vibrant, saturated hues, the only limit to color is your imagination.

Night Vision utilizes advanced pattern tufting technology that produces unmatched flexibility and durability for a variety of commercial spaces. The elegant yet edgy product features Ultron® Nylon 6,6 and maintains the highest standards of commercial requirements for performance and wear. Night Vision is available in 24-inch by 24-inch and 18-inch by 36-inch NexStep® Cushion Tile and AFIRMA™ Hardback Tile and 12-foot High PerformancePC Broadloom.

The product is Cradle to Cradle Certified™, NSF® 140 certified and CRI Green Label Plus certified, and produced in a LEED®-EBOM Gold-certified manufacturing facility.
