## DARE TO BE DIFFERENT

*Just-Launched Styles from The Sorted Collection by Bentley Boast Atypical Sophistication*

**LOS ANGELES (September 2019)** — Today's youth embrace diversity, and even expect it not only in society and in business, but also in design. **Misfit** and **Typecast**, the first two styles to launch in the market from The Sorted Collection by [Bentley Mills](#), celebrate what makes the spaces in which we live and work as special and different as we are.

Despite its name, Misfit is a valued member of The Sorted Collection. It provides a light-hearted blend of whimsical pattern elements, sophisticated textural layering and thoughtful color application. Available in broadloom and tile, Misfit is a versatile solution for a variety of functions and formats.

It may be defined by some as a simple texture but Typecast is more than a one-trick-pony; it's a work horse. With each colorway washing from light to dark, Typecast turns the tables and delivers an inverse companion of dark to light – providing the ability to create uncomplicated yet complex tile installations in areas that beg to be pushed beyond the norm.

Available in a wide array of thoughtful colors, Misfit and Typecast both foster flexibility and coordination. The styles won't hinder or limit creative expression – they encourage it. The products are offered in 18-inch by 36-inch and 24-inch by 24-inch NexStep® Cushion Tile, AFIRMA II™ Hardback Tile and AFFIX™ Hardback Tile, Bentley's adhesive-free hook and loop system for modular carpet tile.

Misfit is also available in High PerformancePC Broadloom for spaces that require an uninterrupted design statement for the floor.

All products in The Sorted Collection are Cradle to Cradle Certified™, NSF® 140 certified, CRI Green Label Plus certified and are produced in a LEED®-EB:OM Gold-certified manufacturing facility. Along with Environmental Product Declarations (EPDs) and Health Product Declarations (HPDs), The Sorted Collection products also contain Declare® labels and have achieved LBC Compliant status through the Living Building Challenge.
