If you take the time to investigate even the simplest of things, you'll often find that there is so much more than what we absorb upon first glance. There can be a depth and texture that, once uncovered, can't be dismissed. Engineered with a unique and innovative fiber process, Bentley's Color Core is a prime example of this anomaly.

Grounded by contrasting complementary yarn components, traditional reds, blues, browns, and greys all subtly expose a more complex identity as they emerge and retreat throughout the entirety of this product. It’s this complexity that allows Color Core to easily morph and blend with other products, while at the same time possess the confidence to tackle an entire space on its own. It’s a classic yet modern go-to that, time and time again, will add dimension to any environment.

After all, at the core of any successful project, a little color is always key.

Patterned carpet may require special attention by the installer to assure a suitable match, and must be addressed in the original labor quotation. Repositioning of carpet tiles may be necessary to ensure light or dark lines do not align at the seams. Products that go through the shearing process may result in a small loss of yarn weight. Slight variations in color among different production lots are normal and should be considered in the overall installation plan. Carpet specifications and components are subject to normal manufacturing tolerances and may change without notice. Product warranted in accordance with the terms and conditions of Bentley’s standard printed warranty in effect at time product is sold. All other warranties, including without limitation any implied warranties of merchantability or fitness for a particular purpose, are hereby disclaimed. Made in USA.
