

**ABET LAMINATI** Two high-pressure laminates will be highlighted. The Parade collection touts bold digital design, durability and easy maintenance in 4'3" x 10' sheets. In addition, Root, from the Legni collection, features a realistic, wood-like surface and is available in seven patterns with a slightly raised texture. Legni wood grain laminates are available in 4' x 10-foot sheets. All products are Greenguard certified with low VOC emissions. FSC certification was just received in Italy, where the laminates are manufactured, and the company is currently attaining an FSC certification for North America.

#### AMERICAN BILRITE

will showcase two LVT lines, Mirra and Sonata; AB Pure, a revolutionary colorfast rubber line, and Stonescape, a 100% VOC- and PVC-free polyolefin flooring. Mirra is a highly resistant LVT for heavy commercial applications, while Sonata is a fashion-forward and affordable commercial line. The company is particularly enthusiastic about AB Pure, which it considers a "revolutionary patented rubber line." With a striking, expansive palette of 36 vivid colors, there is an impressive colorfastness, meaning visuals won't change over time. In addition, the company said Stonescape is its "greenest" product, free of plasticizers, phthalates, chlorine and halogens. Stonescape can be safely disposed in landfills and creates very little smoke in the event of a fire.

# NEW AT NEOCON

NeoCon is the largest trade show for architects and designers in North America, attended by more than 40,000 professionals from the A&D community. With five floors of exhibitors occupying permanent and temporary spaces, visitors have an infinite amount of hard and soft surface product awaiting their perusal. In addition, NeoCon will host a slew of seminars, many eligible for CEU credits, along with expert keynote speakers and educational programs. *GO* received a sneak peak at what some companies will unveil and highlight at the show.

**BENTLEY** New Bohemian and Light Play are two new collections. New Bohemian features Antron Lumena solution-dyed type 6,6 nylon and is available in High PerformancePC broadloom, as well as 18 x 36 and 24 x 24 NexStep cushion tile and Afirma hardback tile. Light Play offers two carpet styles – SoHo Dawn and Melrose Dusk – featuring Antron Legacy type 6,6 nylon. The line is available in 24 x 24 NexStep cushion tile and Afirma hardback tile. Melrose Dusk is also offered in 18 x 36 planks. Both collections are Cradle to Cradle, NSF 140 and CRI Green Label Plus certified, and they are produced in the only LEED-certified carpet manufacturing facility.

**AQUAFIL** is currently touting Econyl yarn, developed from the Econyl Reclaiming Program established by the Aquafil Group to recover nylon 6 waste. The BCF (bulk continuous filaments) division produces nylon for synthetic carpet flooring, which is used in products such as Desso's Airmaster and Visions collections and Interface's Net Effect. The Econyl Regeneration System helps avoid the unnecessary waste of polyamide material. The innovative process recovers nylon from waste such as carpet, clothing and fishing nets, and transforms it back into virgin raw material for new products. Aquafil will reclaim close to 26,000 tons of pre- and post-consumer waste this year. Econyl products will contain at least 50% post-consumer content in 2014.

**BOLYU** will take the wraps off three new carpet collections – Fluid and Fractured, Suit and Tie, and InnerCircle – a new entry in its Level hybrid line, Monogram, as well as the Luxury Vinyl Tile

Design Collection. Fluid and Fractured includes two modular carpet tile styles that embody the technology of design and construction, while InnerCircle is a modular tile designed to deliver a bold composition of color, pattern and texture. The Luxury Vinyl Tile Design Collection combines high-definition digital imaging technology and state-of-the-art manufacturing processes to create new abstract designs. The four carpet products feature Nexterra backing, which is UL certified as NSF 140 Platinum and includes post-consumer recycled content.

Fluid and Fractured
