Making the right material selections can transform learning spaces for students, teachers, and staff. Bentley offers floor covering solutions that support the fundamental purpose of the school itself—safe, long-lasting institutions that promote the best possible environment for learning.

Design From The Ground Up.

The Bentley portfolio of Carpet and Luxury Vinyl Tile (LVT) is the perfect mix of colors, textures, and formats to inspire great designs. Floors designed with a combination of styles can guide passage through the school—cueing circulation and wayfinding, even marking zones for safety. Bentley offers an exceptional library of styles that fit together seamlessly for a better overall experience, supporting the mission and expressing the school's spirit.

Bentley EliteFlex™ 6 ft Cushion makes the difference where acoustics count. Cushion enhances acoustic quality in a room, minimizing ambient noises and clearing the way for the sounds that matter. This is especially important in designated quiet zones and classrooms where learning depends on the ability to listen and to be heard. It's also an excellent solution for corridors, reducing ambient noise and sound transmission throughout the building.

EliteFlex 6 ft. Broadloom. Carpet Tile. Every carpet Bentley makes is PVC- free, and Red List Free.

EliteFlex 6 ft Cushion is backed with a high-density polyurethane cushion that easily recovers from crushing foot traffic and won't degrade due to moisture. The backing system includes a stabilizing sheet within the layers so it won't curl or shrink. The moisture impermeable layer means spills remain close to the

According to the CRI, carpet fibers can act as a reservoir for airborne particles like dust, dirt, and other allergens, easily removed through regular vacuuming and cleaning.

surface, protecting backing and floor. A maintenance program that includes hot water extraction is worry-free. The cushion backing also absorbs energy which not only reduces fatigue in staff and students, but enhances the life of the face fiber.

Use Healthbond™ 2399 with EliteFlex or Bentley Carpet Tiles, AFIRMA II™, LuxFelt™ and NexStep®, for complete moisture tolerance. No testing required.

Bentley's 5 mm LVT offers much greater sound absorbing benefits over other hard surfaces. The layered construction of our 5 mm vinyl flooring system was designed specifically to ensure quieter learning environments, measured in both sound transmission (STC) and impact insulation (IIC).

Bentley 5 mm LVT requires less adhesive, no transition strips to carpet, and the heavier composition means greater forgiveness of subfloor imperfections. Bentley luxury vinyl tile is delivered with a high-performance, scratch-resistant finish designed for heavy-duty traffic and an embossed texture that diminishes slip and fall when compared with other hard surfaces.

With no waxing, stripping or buffing required, our LVT is easy to clean and maintain at a much lower cost than VCT and wood. In fact, we recommend a neutral pH cleaner for both carpet and LVT—simple!

Bentley's Carpet Tile is a great choice for flexible areas that host a mix of activities or need to be reconfigured easily, such as general-purpose rooms, student commons, and teacher lounges. Available in cushion and hardback, 18 in x 36 in and 24 in x 24 in formats, Bentley's carpet tile offering solves a wide variety of performance and styling needs.

Bentley's Broadloom companions are available to match carpet tile styles, so stepped floors in auditoriums and lecture halls can be specified in one style, in both formats. Or choose broadloom for more conventional workspaces, such as administrative offices.

START. Bentley Fast Track – we've stocked over 200 SKUs available for orders of 1,500 square yards or less, and they're ready to ship within 10 business days of order.

FINISH. Bentley's FULFILL™ carpet reclamation program strives for 100% landfill diversion. Our national network facilitates the best reclamation options available, the most cost-effective service, and a stress-free experience.

COLOR CORE™ 4EOT0, SWIM 402552, 18 IN X 36 IN - BRICK
SHAPESHIFTER™ 4SET4, PARTICLE 400034, 18 IN X 36 IN

TROUBADOUR™ 4TOT5, PURE PASSAGE 400331, 24 IN X 24 IN - QUARTER TURN

ASHA recommends that background noise and reverberation be considered when designing spaces for learning. Simple ways to make a classroom quieter include adding soft materials such as carpet or rugs on the floor, and felt or cork on the walls, to absorb sound and dampen noise.

Looking Good for the Long Run.

In addition to a construction that withstands heavy traffic, Bentley is dedicated to using only the highest quality materials, like our proprietary Bentley Premium™ Nylon. Designed to resist staining and maintain resilience, Bentley Premium Nylon holds its texture and color even in high-traffic environments. Its durable design allows dust and soil to be easily removed with regular maintenance, ensuring that installations stay fresh longer. With a unique fiber structure that naturally inhibits staining and soiling, there is no need for additional topical treatments, making it an environmentally friendly choice.
