COLORCAST

BENTLEY®

**We know you love neutrals...
but sometimes a vibrant color
is precisely what you want.**

Creating carpet in a color that exactly aligns to your vision is truly unique in our industry. **COLORCAST™** is our proprietary method for matching color from any source including paint chips, fabric swatches, or even fresh fruit!

Bentley COLORCAST™

How it works.

1 Choose a pattern from the rolls and rolls of tufted greige goods or **create your own version** with the ideal form, texture, and scale to match your vision.

2 Find the color. Find it anywhere. Share it with us.

3 Once the color target is provided **we will create a recipe**, mixing red, blue and yellow dyes in micro amounts to **make the perfect match.**

With **over 40 years experience** in the craft of dyeing carpet, the talented team in our **COLORCAST** studio are experts in the chemistry and magic of achieving your colorful heart's desire.
